Huwa-San Soil

Ecologically safe disinfectant
Based on stabilised hydrogen peroxide
(Colorless, odourless, biodegradable)

General
Huwa-San Soil is a unique and exclusive disinfectant formula to use in the disinfection for all soil disinfection in the agriculture business. It’s highly effective broad spectrum disinfectant against Fungal, bacterial, viral infections. It has outstanding results when used inside green houses and in open fields for soil borne diseases, mainly against Pythium, Fusarium and Nematoda.

Properties:-
- Skin safe-eco-friendly
- Biodegradable – Non Resistance Formula
- does not foam – non Carcinogenic
- odourless and colourless
- completely miscible with water
- active up to a temperature of 113 °C
- remains active and stable for longer periods in the absence of pollution (“depot effect”)

Applications
Suitable, for eliminating of bacteria, fungi, spores, viruses, algae and amoebae.

Directions
* Soil Disinfection: during soil-oxy-fumigation on the drip irrigation system for 20-30 minutes first. After that for each green house (350m) add 5-10kg of Huwa-San Soil inside the mixer and deliver it in the next 15 minutes (3-5% solution)

* Method of applications
Irrigate first for the same period (20-30 min) and for each plant apply for 400-500ml of 5% solution (10kg for each 200 litre of water for one green house.

Specifications
Appearance: colourless, odourless fluid
Active components: hydrogen peroxide as % (24.5-24.9%)
Silver stabiliser as % (0.013-0.017%)

pH (20 °C): 3
Specific density (20 °C): 1.09-1.105 kg/l

Biodegradability
Huwa-San Soil is biodegradable due to its decomposition into oxygen and water. (in accordance with the AFNOR T 73-260 directives).

Storage Conditions:
Storage rooms: room temperature, clean, incombustible, lockable, joint less, smooth concrete floor. Don’t allow to store together with alkalis, reduction agents, metallic, salt and combustible substances.

Safety
1. Keep out of reach of children.
2. Keep away from food, drink and animal feeding stuffs.
3. When using does not eat, drink or smoke.
4. In case of contact of undiluted product with eyes, rinse immediately with plenty of water and seek medical advice.
5. After ingestion of the undiluted product, drink plenty of water.
6. Contact of the undiluted product with the skin should be avoided. In case of contact with the undiluted product, wash the skin with water.

Packing
- Cans of 5-10-25 litres

Storage life
In closed packing the product can be kept for at least 2 years.
